ROBERT SMITH
Proofreader/Representative

E-mail: info@qwikresume.com Phone: (0123)456-789

SUMMARY

A writer, editor, and proofreader with over 12 years of professional experience. Equipped with both the relevant hard skills necessary for the job and the crucial soft skills that make work as absolute pleasure.

SKILLS

Adobe In Design, Adobe Reader, AMA style, AP style.

WORK EXPERIENCE

Proofreader/Representative
ABC Corporation - July 2014 - November 2014

- Prepared listings, reports, maps, and advertisements for yearly publications Tractor Life Directory for the Multi Media Department.
- Prepared listing files for the Tractor Life Directory according to office policies.
- Entered information databases to search for vital information pertaining to listings and reports for the Tractor Life Directory and Woodsells Directories.
- Created and maintained databases on the internet, Excel spreadsheets, and databases.
- Prepared deposition transcripts from court stenographers for use as official legal documents.
- Research current terminology and spelling in order to generate accurate and reliable manuscripts.
- Produced and edited in volume all publications to yellow and white pages. Quality checked specialty publications.

Proofreader
ABC Corporation - January 2005 - July 2004

- Typed and/or scanned and proofread historical abstracts for yearly publications America History and Life magazine and prepared historical abstracts for yearly publications.
- Supervised workflow for the America History and Life section of the Serials Production department.
- Identified and tracked issue copy batches, logging information about batches, monitoring their progress from initial proofing to completion, and creating proofreading projects were completed on time.
- Implemented changes in proofreading house style through collaboration with other department members, this included editing, proofreading, and reviewing.
- Collaborated with other departmental members and other departments on projects involving finding and tracking down specific historical sources.
- Tested and revised new Serials Production department database.
- Assisted the Books Division with the Hardcover Database project.

Aoe2 build.order. Aoe2 build order mod. Aoe2 build order pdf. Aoe2 build order reddit. Aoe2 build order reference.

I suggested advancing with +1 pop, and sending -1 villagers forward, allowing +1 villagers on wood and +1 on food while advancing. If someone has suggestions for important civ-specific constructions let me know (non-arena, at least for now.) Happy to be correct. You're not the first person to say that though - I have to be a magician with Word: Reactions: guitarizt It's amazing, Yes, but first contact me, so I can give you a few pointers and let you know if there's a translation already in progress. Better have more for updates every now and then. Only, be sure to use the correct map that comes with this mod. The list provided above gives you what you can work on in your games. Is this absolutely fantastic, thank you. I have tried so many times;(Building orders take a lot of practice, and the classification system reflects this, great for noobs You can only make fewer farms - you will still want about the same number on food. From there you should be able to use 'Print to PDF'. Are they suitable for beginners? Start by trying to reach at least one C in the first benchmark. 11. For example, the first construction order in the guide has three benchmarks: (1) Click Feudal with 22 population, (2) acquire 6 scouts, (3) click Castle. I think because of the new balance changes we need at least another guy on wood, since we need more wood to build towers now. I am not aware of any Chinese-specific constructions for if - only that you start with 7 on sheep, and advance with perhaps 1 or 2 more vils (in part depending on how good it is.) A player who reaches A in the first benchmark and C in the second can not reach better than a total C. Yes! Just open the scenario in the editor and generate a new map to practice. Before trying, I suggest you are: in terms reach gold in the Art of War tutorials (e.g. Reactions: MaSmOrRa, OLADUSHEK and Mr. St4rk Oh, I understand...smaf ellad avednepid ottt..elfit ou len ottircs iah ehc enoizurtsc id enidrol' noc etlov enuhs hsrut naero'lo anoub al otatset aneppa oh oreicC 1H..ad isrednapse rep aznetrap id otup noub nu ereva ad odom ni...otamref eresse id elbaborop "A is odaauq oster thermarev edl impir i erenetto al opod' npu nu eratetpsa revod elbaborop iS ?noizurtsc esetueq id liblamps/FDP inoisrev onos iC ..evortla itaf itneimabmac illicop i ehcnca ?ovrec i l eredulci iouP supytalPotipar :inoizaeR .ereicra id enoizurtsc an emoc ..etnatsoc enoizuerop n e stk id oiaap n erop olas otanisatis. Reactions: Cicero Updated with various specific builds cив added, added,Mongols/Khmer/Franks Scout Racing, Malay Builds, Khmer FC and (against my best judgement) Korean Tower Race. Thank you. I can use these as starting points - I think I will add a section on Arena builds after all, and some of these will be useful very beautiful Document! May I suggest adding a 2+2 construction for the fast castle, the one where you take 30 gold and sell 100 wood in a feudal age? Launch a game in Single Player and choose Custom Scenario as the game mode. Reactions: Unbelievable job. To make a translation, you can use this script to make audio files, github. (Build Order Arabia, build the island of order, or build the area of order). Why can't I have an A? Reactions: Turmabar94 and Cicero Then perhaps it should be specified that the kts BO is intended only to make a couple of kits and not constant production, as a construction of archer. I do not ask or expect donations for my work, but are very appreciated and will help me maintain this website running. Then do we click on pop 20? It is the same Bo for arenas except that you jump chassis on arena so you can go for a 2+2 FC Castle drop on Arab pocket as well its no problem. Recorded games break with every DE update, but you can find A+ demonstrations here. (I've made some updates since the last time I've published, so I suggest changing for those using previous versions).) HI I have just tested the good of'reach truest with the building order you wrote in your file. I removed the Drush - Knights BO at some point because as far as I can say it is not really a thing made. Of course, I could add a short writing before each build to explain the goal / purpose of each build. You can practically just combine BO for Drush FC & PCBut. Finally, don't change the player's color! This breaks the scenarios. This is taken from ST4RK videos. How can I download them? Also be aware that it may be necessary to restart the game for audio files to be loaded in. This is road to 1k @Cicero What about a drush into knight? I assumed it was late, too, it will be good to see the economic benefits of taking deer. You can send more villagers to gold after reaching castle if going 1 TC, 2 stable. I recommend you try opening and deleting the mod directory before reloading the game and subscribing to the mod again. Build orders assume constant villager production, so there isn't that much point in trying to follow these builds exactly when you have significant TC idle time. After the build order ends, you should send more villagers to wood, until you start building a surplus, at which point you can send villagers to farms also. I can provide you arena BO for some strats: Normal monk rush Fast monk rush with Saracens Fi 19:30 min with Byz Direct 4 tc with Brit Etc. Shortest ST4RK's castle drop build by 1 vil, but I think its more a build for Mayan/Spanish pocket on Arabia, that for Arens where you are more likely to have a low ec -26+2 pop caple drop. Can I make a translation of this mod? I believe it's because (1) you start producing from ranges straight away, whereas you will accumulate gold for knight while advancing to castle and (2) you probably won't have the food to support producing from 2 strates constantly after going to castle, whereas ranges can and generally should be kept working independently. You may want to unlock 'Headers and Footers' and change the margin size (1 margin) so Arens builds together in a single document. 10 on gold for 2 ranges archers and only for kts? I've actually already made changes to allow for the recent balance changes, and also just to make it a little easier since I found St4rk's build very 'tight'. Reactions: AceW Hey @Cicero Would you like to add these build order to the building order overlap app? Do you have any comments or questions? Early Fantasy, Fast Castle, Are + Booting) Comfortable with building after being asked. Mating the mateate by working Tsking here under the TC Luring build and 'frace-drawing' Fleet using the following shortcut keys: Goto TC, create village, build village, set collect point + ungarrison (for wild tourism) Go to eco-building (for eco-renewable) Go to military buildings Ctrb-group for scout + wild boar that attract the village How does the classification system work? How can I give you? Can I play these scenarios on a different map? 3/4 on gold for the constant production of double range archers are you joking? Afak constant production archer is like 3-4 on gold and kts is 6-8, depending on updates and bonus civ. Moaisoul and Poxo Then perhaps it should be specified that the kts BO is intended only to make a couple of kits and not constant production, as a construction of archer. How about constructions for Chinese? Mod pages are linked here. Goodness there are a lot of different types of FC/FE there. How can I contact you? How about adding more vills on wood in the dark age? I can provide you with the BO arena for some layers. Normal super fast monk race with Saracens Fi 19:30 min with direct by 4 tc with Brit Etc. Reactions: Cicero 10 on gold for 2 archer intervals and only 6 for kt? Necessity of 7 minimums to be safe. A "A+" is certainly not necessary to enter multiplier! If this is all new for you, expect some degree to be out of reach. Be also aware that the classification system is a little bit dependent on what you are looking for - and therefore do not forgive if you are not focusing on the specific requirements of the scenario. Some possibilities, although the MOD requires a little more time to download, it seems that it can be blocked in a partially downloaded state if the download is interrupted. Why? Why? These scenarios work for me? How does the classification system work? The advantage is that you have 100 wood in a mining field and do not need gold (or stone) since you only do 3 TC. (The build of ST4RK is 29+2, but I suppose it is quite easy to add some other villager if you want more ECO, or you simply have to tie a little 10 gold for 2 archers and only 6 for KT? You can see my hotkeys here. You should also make a translation of the table string [Link download]. The use of wood here is the key: something went wrong if you have a large amount of wood not spent in your escort. IMO is better to have a solid by without deer, then it will be even better when you get them - rather than being too dependent on them and risking that things go wrong when you don't have them. Rarely do more than 8 kts with 2 stables of constant and constant production at the beginning as FC TG. The best ways are Discord at Cicero#7740 in Aozenze. Hey @cycling are you okay with me by adding these building orders to the build overlap app? Thanks, I'll examine it (there are so many FC variants though: SJ) Reactions: Guitarizt Amazing Work Man, you're great! Reactions: Cicero Great and Constant. First of all, do not work on all scenario at once. How do I play them? No problem: go ahead I just updated the document, so make sure you have the latest version. What are the shortcut keys you use? Start with BF things but end with BOS General. Not everyone is serious. It's finally here ... Guide to interactive build orders Imponi in the DE version: Objectives/instructions now all appear in the panel in the top right display in the middle of the screen for better visibility in the middle of the screen and will also be displayed in the Objectives menu to refer to the instructions of the reduced home until the end of the screen of ethon to some construction orders, in particular the men of construction of men that the changes to the difficulty - the lowest votes are more easy: The most difficult degree is Cetub and Seket Pox same that suban m -) milm .Quann , Quadeo , Quadas , Quad.)
