Template ini dirilis tahun 2020 lalu dan terus mendapatkan pembaharuan hingga 2021 ini,Ã Â Padahal gratis loh!Adapun kelebihan template ini antara lain :Loading kencangKode tidak dienskripsiBagian copyright bebas kita gantiPunya grup support di telegramdan banyak lagiMari kita test melalui Google Page Speed, dan skornya adalah :Desktop Home page : 99/100Mobile Home page : 95/100Desktop Post page : 99/100Mobile Post Page : 94/100Bagian It is difficult to find one less from this free model. Here is list: 1 It seems that it is like this is as a premium model that is free by creators. Model for Indonesian Blogs? Indonesian NETIZENS are not the same as foreign registrars. Going, which makes the target of your readers is not the same as making targets to read foreigners (Caucasian, and so on). In Indonesia, the internet speed is still uniformly distributed in each region. Was updated and finally in version 1.4 updated on January 26, 2020. Although the name of the model is Oreo, round-shaped biscuits in the middle of very popular creams with small children, adolescents, for adults, But the quality does not have to be doubted. With the concept of design, models that it can be used for personal blogs, tutorials, recipes and more kompa relatives, Indonesian internet speed speed is almost at the lowest point in comparison with 40 other countries. From the results of the Hootsuite search, in January 2020, our internet speed is only in the number 20.1 Mbps and is far below the world's world (worldwide) that reaches 73.6 Mbps. Data, the blogger-going model is forced to be: fast and lighter load as SUGENG, Kompiajib and others, because access to the Internet outside people are already fast. Want to know: model but sugeng: incredible! (Very recommended) Which one should be chosen? All models have advantages and disadvantages of each. This time the pubway will return to discuss about the blogger model, but the free version (free version) that has qualified quality according to your own pubway.
